Data Sources and Calculations						
Industry Data						
In order to capture a complete picture of industry employment, EMSI basically combines covered employment data with total employment data in Regional Economic Information System (REIS) published by the Bureau of Economic Analysis (NES) published by the U.S. Census Bureau. Projections are based on the latest available EMSI industry sub-state area industry projections published by individual state agencies, and (in part) growth rates.						
Occupation Data						
Organizing regional employment information by occupation provides a workforce-oriented view of the regional economy. The data are derived from the Occupational Employment Statistics program (U.S. Bureau of Labor Statistics). The (SOC-to-CIP) crosswalk is based on one from the U.S. Department of Education, with customizations.						
State Data Sources						
This report uses state data from the following agencies: Oklahoma Employment Security Commission.
